

Week 5 Homework

For this homework, you will need the `ml-latest-small` dataset from [MovieLens](https://grouplens.org/datasets/movielens/) (<https://grouplens.org/datasets/movielens/>).

1. Extract all movies whose list of genres contains "Comedy".
2. Find the average user rating and the number of ratings for each comedy movie.
3. Remove movies with less than 50 ratings.
4. Among the remaining movies, find the 5 highest-rated movies and the 5 lowest-rated movies.
